

Colorado Blue Spruce Tree

Hardiness zones: 2-7. It grows well while young and matures at 50-75'; 10'-20' spread in the landscape, up to 135' and 35' spread in the wild.

Instructions:

1. Soak seeds in water for 24 hours
2. Sow seed 1/8" deep,
3. Tamp down the soil and mulch the seed bed

Tips & Warnings:

- Growth is rather slow at first
- Germination: 15-30 days
