

Quaking Aspen Tree

Hardiness zones: 1-7, This fast-growing tree is the most widely distributed tree of North America, ranging in its natural habitat from the northeast coastal states to Alaska and down the Rocky Mountains into central Mexico. Stunning fall leaf colors accent the smooth greenish white to cream-colored bark on a long and narrow trunk. Tolerant of many soils. Plant in full sun. Grows 40'-50' with 25' spread.

Instructions:

1. Soak in water, let stand in water for 6 hours.
2. Sow immediately on surface of the soil. Do not exclude light, which is needed for germination.
3. Keep moist. 70°F
